DESN1023 Visual Media Design
Assessment Task 2: Portfolio Draft Action Plan (35%)

Name: Gabriel Modica

Student ID: 22262017

My Mood Board

My Series of Images (1/5)

My Series of Images (2/5)

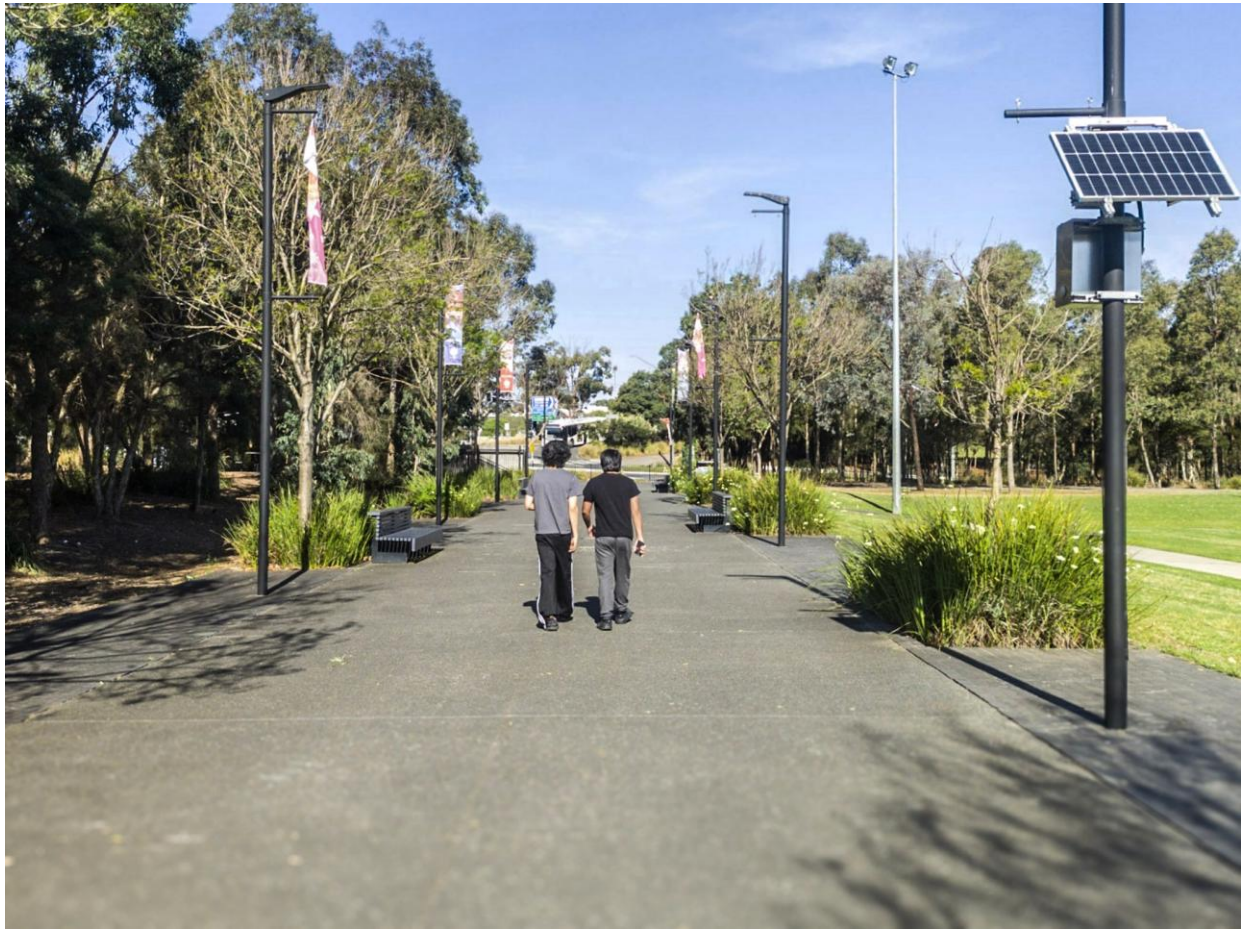

My Series of Images (3/5)

My Series of Images (4/5)

My Series of Images (5/5)

Individual Photographs (1/5)

Unedited

Edits

Increased **brightness** on subject.

Blur applied to the background.

Increased **vibrance.**

Edited

Individual Photographs (2/5)

Unedited

Edits

Increased **vibrancy.**

Increased **brightness** on subject.

Edited

Individual Photographs (3/5)

Unedited

Edits

Cropped to focus more on subject.

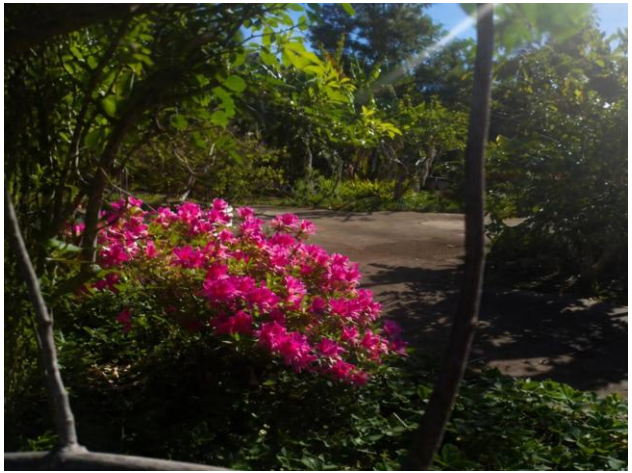

Increase on **saturation**.

Edited

Individual Photographs (4/5)

Unedited

Edits

Cropped to focus on flowers and **framed** with the branch.

Blur applied to the background.

Increased **vibrance** on flowers and sky.

Edited

Individual Photographs (5/5)

Unedited

Edits

Small decrease on **exposure**.

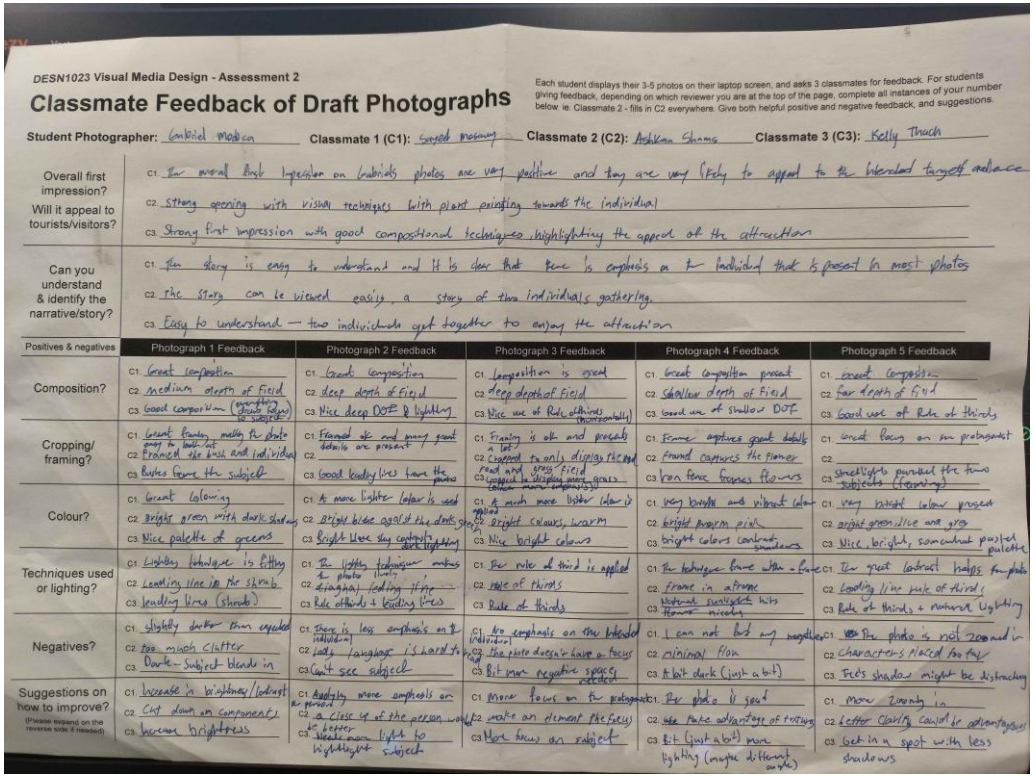

Image slightly **rotated** to be centred.

Blur applied in the bottom of the image.

Edited

Classmate Feedback

DESN1023 **Visual Media Design - Assessment 2**

Classmate Feedback of Draft Photographs

Each student displays their 3-5 photos on their laptop screen, and asks 3 classmates for feedback. For students giving feedback, depending on which reviewer you are at the top of the page, complete all instances of your number below. ie. Classmate 2 - fills in C2 everywhere. Give both helpful positive and negative feedback, and suggestions.

Student Photographer: Gabriel Madden **Classmate 1 (C1):** Swapped missing **Classmate 2 (C2):** Ashkan Shams **Classmate 3 (C3):** Kelly Thach

Overall first impression? Will it appeal to tourists/visitors?	C1. Your overall first impression on Gabriels photos are very positive and they are very likely to appeal to the intended targeted audience C2. Strong opening with visual techniques with plant pointing towards the individual C3. Strong first impression with good compositional techniques highlighting the appeal of the attraction
Can you understand & identify the narrative/story?	C1. The story is easy to understand and it is clear that there is emphasis on the individual that is present in most photos C2. The story can be viewed easily, a story of two individuals gathering. C3. Easy to understand — two individuals get together to enjoy the attraction

Positives & negatives	Photograph 1 Feedback	Photograph 2 Feedback	Photograph 3 Feedback	Photograph 4 Feedback	Photograph 5 Feedback
Composition?	C1. Great composition C2. Medium depth of Field C3. Good composition (eye catching focus point in subject)	C1. Great composition C2. deep depth of Field C3. Nice deep DOF & lighting	C1. Composition is great C2. deep depth of Field C3. Nice use of Rule of thirds (horizontally)	C1. Great composition present C2. Shallow depth of Field C3. Good use of shallow DOF	C1. great composition C2. Far depth of field C3. Good use of Rule of thirds
Cropping/ framing?	C1. Great framing making the photo easy to look into C2. Framed the bush and individual C3. Evenly frame the subject	C1. Framed ok and many great details are present C2. C3. Good leading lines have the photo	C1. Framing is ok and precise a lot C2. Cropped to only display the road and grass field C3. Cropped in slightly more (could've been more emphasis)	C1. Frame captures great details C2. Frame captures the flower C3. Iron fence frames flowers	C1. Great focus on on protagonist C2. C3. Streetlight pointed the two subjects (frame)
Colour?	C1. Great colouring C2. bright green with dark shadows C3. Nice palette of greens	C1. A more lighter colour is used C2. Bright blue against the dark green C3. Bright blue sky contrasts dark lighting	C1. A much more lighter colour is applied C2. Bright colours, warm C3. Nice bright colours	C1. Very bright and vibrant colour C2. bright warm pink C3. Bright colors contrast shadows	C1. Very bright colour present C2. bright green, nice and airy C3. Nice bright, somewhat pastel palette
Techniques used or lighting?	C1. Lighting technique is fitting C2. Leading line in the shrub C3. Leading lines (shrub)	C1. The lighting technique makes the photo flourish C2. diagonal leading lines C3. Rule of thirds + leading lines	C1. The rule of third is applied C2. rule of thirds C3. Rule of thirds	C1. The techniques have been applied C2. Frame in a frame C3. Natural sunlight hits flower nicely	C1. The great contrast helps the photo C2. Leading line rule of thirds C3. Rule of thirds + natural lighting
Negatives?	C1. Slightly darker than expected C2. Too much Clutter C3. Dark — Subject blends in	C1. There is less emphasis on the individual C2. Lady (anglage) is hard to see C3. Can't see subject	C1. No emphasis on the intended individual C2. The photo doesn't have a focus point C3. Bit more negative space needed	C1. I can not find any negatives C2. minimal flow C3. A bit dark (just a bit)	C1. Yes the photo is not zoomed in C2. Characters placed too far C3. Trees shadow might be distracting
Suggestions on how to improve? (Please expand on the reverse side if needed)	C1. Increase in brightness/contrast C2. Cut down on components C3. Increase brightness	C1. Amplify more emphasis on the protagonist C2. a close up of the person would be better C3. Needs more light to highlight subject	C1. More focus on the protagonist C2. make an element the focus C3. More focus on subject	C1. Be photo is good C2. use flare advantage of testing C3. Bit (just a bit) more lighting (maybe different angle)	C1. More zoom in C2. Better clarity could be advantageous C3. Get in a spot with less shadows

Classmate Feedback Analysis

The feedback given by my classmates have been beneficial after taking another look through my images. I believe that the shadows shown on my photographs are a distracting element whilst also lowering the tones on my subjects which makes it hard to put the emphasis on the individual shown on the image, and to make the improvement I would need better lighting while also choosing better angles or time of the day. Furthermore, the positives seem to be with my use of colouring in the images which shows that I seem to be putting more effort on the colours as compared to the lighting as shown on some of these images.

The techniques I have used on the images have been accurately identified such as my use of rule of thirds and leading lines, but I am mostly confused about my **Image #3** as it did have a subject which were the individuals in the field and building shown at the center, and the 'negative space' needed I disagree with as it does have a lot of negative space that I had to crop it to focus on the subjects. Nonetheless, those are my only complaints, and the rest have been very helpful.

Structured Action Plan

List specific areas for improvement (e.g., composition, storytelling, use of symbolism)	***List proposed changes*** (e.g., techniques to experiment with, elements to refine, lighting and camera effects).	***List the steps required to implement these changes*** (e.g., editing, re-shooting, research).
Cropping the unnecessary elements in the composition such as the distracting trees and to focus more on the subjects in the images.	The changes will consist of better lighting and lowering the shadows on the subject as it can be difficult to see the individual shown in the image.	I will experiment with aperture settings to blur the distracting elements and get better focus on the subject, and taking shots from different angles for better lighting.
The subject of **Image #3**, requires better signs of storytelling in the image, the focus was on the symbolism of love, but the storytelling in the image does not go anywhere.	Regarding **Image #3**, more emphasis on the subject and less negative space to put more attention on the individuals whilst providing whilst trying to add elements such as leading lines to create more emphasis on the subject.	Diverse shots in multiple angles and experimenting with different colours by taking shots during the day and afternoon, as well as implementing hints of symbolism whilst trying to tell a story as to why it leads to the image.
Brightness needs to be adjusted such as **Image #1** and **Image #2** for individuals to properly comprehend what my image is trying to achieve.	I need to find locations to properly take the image, as the trees are covering the lights from **Image #1** and **Image #2**, as well reducing the background distractions that appear in the image.	Image in a lower elevation would remove the distracting background in the image, increase the ISO to brighten the image to make it easier to see the subject.
For **Image #1,** exposure needs to be lowered as it can be distracting.	Edits are needed to reduce overexposure and retain the contrast needed in the image and atmosphere of the image.	Edits within a software will be sufficient in reducing overexposure as shown in the image's background.
Different types of composition, as I mostly used rule of thirds and centred composition which was easily recognisable.	More shots in higher elevation or hills for wider images and experimenting with different elements such as over-the-shoulder shots and symmetry and balance.	To achieve these steps, I would need to get out of my comfort zone with the compositions I have grown accustomed to and trying out different techniques.

Your Personal Goals For Refining Your Portfolio

My **current goals** are to lower shadows that conflict with my emphasis on the subject, as well as improving my composition by experimenting with different shots and composition as compared to sticking with the rule of thirds and making sure that the image is framed that individuals in my images are being focused on while removing the unnecessary elements such as cropped trees and images being cut off from the frame. Furthermore, I need edits to get rid of the overexposure in some of the backgrounds of the image whilst increasing brightness and improving the colours to make it less dull.
